INDUSTRIAL CONSTRUCTION PROGRESS IN HUNGARY

**FINISH ROLLING SHEDS AT MATYAS RAKOSI TUBING PLANT -- Budapest, Szabad Kép, 27 May 52**

Construction work on the three 240-meter-long rolling sheds of the Matyas Rakosi Tubing Plant will be finished by the end of this month. The concrete foundations of the 100-meter-long finishing shed will be completed at the same time. The shed buildings went up in record time because durable, oil-paper-lined plaster-of-Paris molds were used in prefabricating the shed supports.

The tubing plant, though begun less than a year ago, already boasts two shops and a rolling train.

**PREPARE FOUNDATION FOR STALINVAROS BLAST FURNACE -- Budapest, Nepszava, 23 May 52**

To make a suitable foundation for the nearly completed iron substructure of the 700-cubic-meter Stalinvaros blast furnace, piles are being driven into the loess soil at the building site. Groundwork for the 70-meter-long foundry shop between the two blast furnaces and the underground pipeline which will connect the furnaces with the plant reservoir is progressing rapidly.

**GANZ ADMINISTRATION BUILDING NEARS COMPLETION -- Budapest, Nepszava, 22 May 52**

The Ganz Wagon Factory's new administrative headquarters was finished this week. The 44-meter-high, 11-story office building will have an auditorium and workers' dining room on the top floor; the basement will house the plant's telephone switchboards.
